

**Assessment Annotations
for the Curriculum Frameworks**

Communication Arts

Grades 3, 7, and 11

**Missouri Department of Elementary and Secondary Education
Robert E. Bartman, Commissioner of Education**

Assessment Annotations for the Communication Arts Curriculum Framework

This document includes the left-hand column (“What All Students Should Know”) and the center column (“What All Students Should Be Able To Do”) from *Missouri’s Framework for Curriculum Development in Communication Arts K-12*. Next to these two columns has been added a column which includes assessment notes for those grade levels which will be tested in the Missouri Assessment Program (MAP). The annotations found in this column are intended to provide information for administrators, curriculum directors, and teachers concerning what is or is not “fair game” for the new statewide performance assessment in communication arts.

Teacher work groups met in late 1996 and early 1997 to decide which of the seventy-three Show-Me Standards should be assessed by the communication arts portion of the MAP. These teacher groups identified the following list of standards:

Communication Arts Knowledge Standards: 1, 2, 3, and 4.
Performance Standards, Goal One: 1.1, 1.5, 1.6, 1.7, and 1.8.
Performance Standards, Goal Two: 2.1, 2.2, and 2.4.
Performance Standards, Goal Three: 3.1, 3.4, 3.5, 3.6, 3.7, and 3.8.
Performance Standards, Goal Four: 4.1.

Another group of teachers then went through the communication arts curriculum framework and, using the list of standards above as a guide, noted which benchmark statements were fair game for a statewide paper and pencil test.

This teacher group faced an additional problem: the benchmark statements in the curriculum frameworks are at the fourth, eighth, and twelfth grade levels, while the communication arts portion of the new performance test will be given at grades three, seven, and eleven. Therefore, the group also identified those skills which were only *introduced* at the benchmark grade levels, since, for example, it would not be fair on a seventh grade test to assess a skill that is not introduced until grade eight.

At the top of the assessment notes column, the grade level of the test in question is identified (third, seventh, or eleventh). Below this heading, the knowledge benchmark statement from the left-hand column is repeated. In some cases, this benchmark statement has been qualified because only part of the benchmark is assessable on a statewide test. Any modifications made to the original statement are explained in parentheses. Below the knowledge benchmark statement, information is given on each of the performance benchmarks found in the middle column. If the letter is followed by the words “Grade 3 (or 7, or 10) state assessment,” this benchmark is considered fair game for the assessment at that level. If the benchmark can not be assessed on the statewide test, it is marked “Local assessment.” If *part* of the benchmark is assessable on the state test, the benchmark is modified to reflect the portion of the benchmark that is assessable. The modifications to these benchmarks are explained in parentheses. Finally, if the benchmark *is* assessable on the statewide test, but is not “fair game” for assessment until the next higher testing level, the annotation will say, “Beyond 3rd (or 7th) grade state assessment.”

Please note that not all of the skills identified here as “fair game” for a state test will show up on the test in any given year.

K-1 2 Content Overview

To live successfully in an ever-changing world, students must be able to locate, decode, analyze, explain, and apply ideas and information. Because of the tremendous number of resources available, students must possess the skills to access data quickly from a variety of sources. Once they have located information, they need to be able to evaluate that information critically (for example, analyzing informational sources for bias, looking for strengths and weaknesses in an argumentative piece, or analyzing the effect of advertising on society). They also need to organize that information in ways that make sense to them (for example, through note-taking; paraphrasing; summarizing; and the use of graphic organizers such as flowcharts, graphs and diagrams).

But students need to be able to do more than simply locate, evaluate, and organize information. In order to actively engage with the world around them, students must be able to *demonstrate* their understanding by creating new communications, by applying newly acquired information to new situations, and by making connections between information, ideas and their personal experiences.

Obviously, these are complex processes that require repeated practice. Therefore, these skills are introduced in this framework at the earliest possible time, then spiraled in complexity as students move up through the grade levels. For example, by the end of second grade, students are expected to be able to talk about characters and their actions in stories. By the end of fourth grade, students should be able to identify and discuss story elements (such as setting, plot, structure, characters and themes). The ability to identify story elements beyond simple characterization is clearly a more advanced skill. Students at this level should be able to put their analyses into writing in addition to being able to discuss them orally. At the middle school level, students are expected to be able to recognize and discuss literary genres, compare and contrast texts, and examine cause and effect relationships. These skills significantly deepen students' understanding of literature. Finally, at the high school level, students are asked to make more sophisticated judgments on texts, moving beyond analysis to evaluation of literary techniques, author's purpose, style, and tone.

What All Students Should Know	What All Students Should Be Able To Do	3 rd Grade Assessment Notes

By the end of grade 8, all students should know how to

3. Process, organize and evaluate information and ideas. (CA 2-7)

See note on p. 14.]

What All Students Should Be Able To Do

By *the end of grade 8*, all *students* should be able to

- a. recognize different viewpoints, biases and propaganda (1.6; 1.7)
- b. distinguish between fact and opinion (1.6; 1.7)
- c. draw conclusions and form opinions (1.6; 1.8)
- d. take notes and record **sources** consulted (1.6; 1.8)
- e. summarize main ideas (1.6; 1.8)
- f. determine relevance of information to purpose and audience (1.5; 1.6)
- g. process and organize thinking about a topic using a variety of formats (1.8; 1.10)

7th Grade Assessment Notes

3. Process, organize and evaluate information and ideas.
 - a. Recognize different viewpoints and biases. (Recognition of propaganda is beyond 7th grade assessment.)
 - b. Grade 7 state assessment
 - c. Grade 7 state assessment
 - d. Local assessment
 - e. Grade 7 state assessment
 - f. Grade 7 state assessment
 - g. Local assessment
